

Teacher training for Data Literacy & Computer Science competences

D5.1 - Research of policies/curricula

train-dl.eu

Austrian Computer Society OCG

1. Executive summary

The research for this deliverable was done in parallel with the research for deliverables D1.1 and D1.2 – the gathering of information about existing policies and policy measures regarding AI and DL education, the policy compare system and monitor respectively. As part of this extensive research, also existing policies and curricula regarding DL&AI education and teacher training recommendations were investigated for deliverable D5.1. Our analyses revealed that the focus areas of deliverable D1.1 and deliverable D5.1 are strongly interrelated. In favour of a coherent structure and a comprehensible and consistent report, it was decided to integrate the findings of the research for this deliverable into the reports of deliverables D1.1 and D1.2. Therefore, for a detailed report on the research findings refer to the uploaded deliverable reports of D1.1, D1.2 respectively.
